Special Issue:

MODERN AND ANCIENT ICE-MARGINAL LANDSYSTEMS

Edited by: David Evans and Andy Russell

Preface 1

Research Papers

Geomorphic implications of subglacial drainage configuration: rates of basal sediment evacuation controlled by seasonal drainage system evolution
D.A. Swift, P.W. Nienow, N. Spedding and T.B. Hoey 5

Sediments and landforms at Kvíárjökull, southeast Iceland: a reappraisal of the glaciated valley landsystem
N. Spedding and D.J.A. Evans. 21

Fluvial–lacustrine interaction on Skeiðarársandur, Iceland: implications for sandur evolution
P.M. Marren 43

The impact of surges on the ice-marginal landsystem of Tungnaárjökull, Iceland
L. Andrzejewski 59

The Pleistocene end moraine fans: controls on their sedimentation and location
D. Krzyszkowski and T. Zieliński. 73

Sedimentary successions in ice-marginal fans of the Late Saalian glaciation, southwestern Poland
D. Krzyszkowski. 93

Sedimentology of a glaciofluvial landsystem, Lough Ree area, Central Ireland: implications for ice margin characteristics during Devensian deglaciation
C. Delaney 111

Self-organisation, fractal scaling and cyclicity in Late Midlandian glacio-deltaic sediments associated with Glacial Lake Blessington, Co. Wicklow
A.E. Richards. 127

Relict lateral moraines in northern Sweden—evidence for an early mountain centred ice sheet
O. Fredin and C. Hättestrand. 145

Polyphase deformation at an oscillating ice margin following the Loch Lomond Readvance, central Scotland, UK
E.R. Phillips, D.J.A. Evans and C.A. Auton. 157

Melting of the glacier base during a small-volume subglacial rhyolite eruption: evidence from Bláhnúkur, Iceland
H. Tuffen, H. Pinkerton, D.W. McGarvie and J.S. Gilbert 183

Research Papers

Variations in character and preservation potential of vegetation-induced obstacle marks in the variable discharge Burdekin River of north Queensland, Australia
K. Nakayama, C.R. Fielding and J. Alexander 199

PII: S0037-0738(02)00171-9

Provenance derived from the geochemistry of late Paleozoic–early Mesozoic mudrocks of the Pyeongan Supergroup, Korea
Y.I. Lee 219
Application of the Hofmann shape entropy to determine the settling velocity of irregular, semi-ellipsoidal grains
J.P. le Roux 237
High-resolution seismic imaging of outcrop-scale channels and an incised-valley system within the fluvial-dominated Lower Freshwater Molasse (Aquitanian, western Swiss Molasse Basin)
D. Morend, A. Pugin and G.E. Gorin 245
Deposition of sheet-like turbidite packets and migration of channel-overbank systems on a sandy submarine fan: an example from the Late Miocene–Early Pliocene forearc basin, Boso Peninsula, Japan
T. Saito and M. Ito 265

Errata
Erratum to "Neoproterozoic Chuar Group (~ 800–742 Ma), Grand Canyon: record of cyclic marine deposition during global cooling and supercontinent rifting" [Sediment. Geol. 141–142 (2001) 465–499]
C.M. Dehler, M. Elrick, K.E. Karlstrom, G.A. Smith, L.J. Crossey and J.M. Timmons 279
Erratum to "Sedimentation and Tectonics along a Rift Basin Margin: The Gulf of California" convened at the 1998 fall meeting of the American Geophysical Union, December 1998 (San Francisco) [Sediment. Geol. 144/1-2 (2001)]
J.J. Halfar and E.H. Nava-Sanchez 281
"Sedimentation and Tectonics Along a Rift Basin Margin: The Gulf of California" convened at the 1998 fall meeting of the American Geophysical Union, December 1998 (San Francisco)
J. Halfar and E.H. Nava-Sanchez 282
